Color Correction

Investment	Per sq. ft.
\$125	0 – 2,500
\$200	2,501 – 3,499
\$300	3,500+

## Better Pictures. Faster Sales.

Many prospective buyers view images online before deciding what properties to view in person. Showing your listings in the best possible light is key factor in selling properties faster and for higher values.

## Super Wide. Super Sharp.

We use professional grade super-wide angle lenses for superior sharpness, contrast and color. Our equipment is top of the line, which allows us to deliver very high quality photos to our clients.

## Color Correction

Arnold Photography corrects each photo to ensure the colors are crisp and true not yellow and faded. Walls, floors and cabinets are rendered true to form as the human eye would see them.

## Plenty of Images

The images provided would be full, .jpeg images, both high and low resolution provided for both web and print. Quantity between 25-100 depending on the size of the home.
